Fig. 6

FIG. 7 is a flowchart illustrating a process for establishing a client session through a central broker (CB) and an application (APP). The process begins with a "Start" terminal, followed by a sequence of steps: "APP registers with MM" (710), "MM allocates APP to a CB" (720), "CB initializes APP" (730), "CB connects to APP" (740), "CB notifies APP of meeting events" (750), and "APP establishes client session through CB" (760). The process concludes with an "End" terminal. A bracket indicates that the steps "CB initializes APP" (730) and "CB connects to APP" (740) may be performed in parallel.

May be performed in parallel
